AMGEN

► **Specific Plan**

A comprehensive near-term and long-term transportation study was prepared by C+A for the world headquarters of AMGEN in the City of Thousand Oaks. This study helped determine transportation needs and impacts of a 6,000+ employee expansion of the major biotech company. The C+A study analyzed and addressed traffic, parking, transit, TDM, bicycle access, circulation and pedestrian impacts. Mitigation measures were developed to meet all local and regional requirements.
